

DIVE INTO LUXURY

Transform your home with a Hydrocare Leisure custom-designed or renovated swimming pool

Imagine stepping into your garden and being greeted by the sparkling blue waters of your own custom-designed swimming pool - a private oasis that not only enhances your outdoor living space but also serves as a sanctuary of relaxation and enjoyment for you and your family. This dream can become a reality with Hydrocare Leisure, a small, local business owned by James and Julie Phillpot.

For more than 20 years, Hydrocare Leisure has been at the forefront of pool renovation and the crafting of bespoke swimming pools for properties across Sussex. Coming from multiple generations of pool builders, James has dedicated his entire working life to this industry, bringing the skills, knowledge, and passion passed down through his family to every project Hydrocare Leisure takes on. Our dedication to delivering high-quality, tailored solutions has earned us a reputation for excellence.

At Hydrocare Leisure, we pride ourselves on offering a truly personalised service. James personally handles all the designs and project management, ensuring that every pool reflects our client's vision and needs. Using state-of-the-art 3D CAD software, we work closely with you to develop a detailed visual representation of your pool, allowing you to make informed decisions before we even break ground. From the shape and size of the pool to the finishing touches like lighting and landscaping, every detail is carefully considered to harmonise with your property.

During the construction or renovation, our hand-picked team of local builders handle everything with precision, from the initial excavation to installing the latest filtration and heating systems. This attention to detail guarantees a high-quality build and a pool that will last for years to come. Sustainability is a key consideration, with options to use heat pumps, advanced filtration systems, LED lighting and even a pool solution made

from entirely recycled materials.

The finishing touches truly lift the space from functional to exceptional. These can include carefully chosen landscaping that integrates the pool seamlessly into your garden, elegant lighting that enhances evening swims, and custom decking that creates a comfortable area for lounging. These details add to the visual appeal and enhance the overall experience of your outdoor space.

Adding a swimming pool to your Sussex home offers more than just a place to swim - it creates a retreat that enhances your quality of life. A well-designed and carefully constructed pool can provide countless benefits, whether it's a place for family gatherings, a spot to relax after a long day, or simply an elegant addition to your property. A pool can also significantly enhance the value of your home, making it a smart investment that increases both the enjoyment of your living space and the marketability of your property.

From the initial design consultation to the final touches on your pool, Hydrocare Leisure offers a comprehensive service that takes the stress out of pool ownership. With our small, dedicated team of Sussex-based engineers and builders, every aspect of your pool project is handled with the utmost professionalism and care. As members of both SPATA and ISPE, we adhere to the highest industry standards, giving you peace of mind that your pool will be built to last.

Discover the Hydrocare Leisure difference and transform your Sussex home into the ultimate destination for relaxation and enjoyment.
